Volunteer at COP1 association, organizing and realization of food distributions (France)

Languages

Native language Italian

Other Languages French (C2), English (C1 - IELTS)

Social and organisational skills and competences

Ability to work in a team in academic and professional contexts, developed during internships and at university. Adaptability to multicultural contexts thanks to international studies in France and Italy and knowledge of several languages. Experience in environmental project management. Time management and project organization skills. Communication and mediation skills, strengthened by volunteering experience.

Technical skills and competencies

Competence in data analysis using R

GIS (Geographic Information System) for mapping and spatial analysis

Artistic skills and competencies

I have always had a great interest in creating, experimenting with different disciplines such as dance, piano - which I played for a few years - and drawing, which has long been a passion of mine. Today I practice crochet and photography (a very new practice for me). I also continue to practice dance independently and have recently started learning a new instrument: the guitar. I like to challenge myself to learn new things, even though it can be difficult, it's always nice and inspiring to see my progress, whether in the creative or academic world.
